

Disposable Mixers

Nordson EFD's disposable static mixers are ideal for single-use dispensing applications. Mixing elements are molded from acetal, or polypropylene, while housings are molded from either polypropylene or nylon.

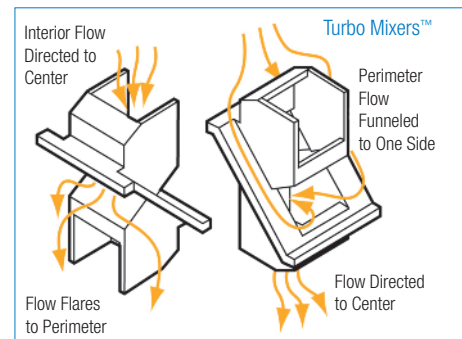

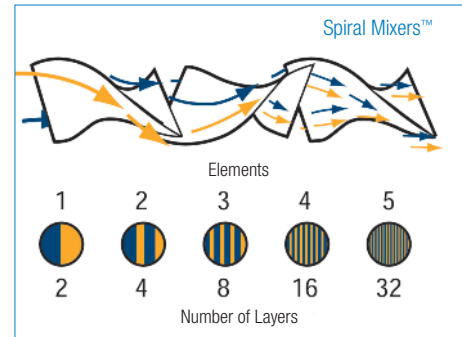

EFD offers disposable mixers in two different geometries:

Spiral Mixers™

- Series 120 Disposable Plastic Mixing Elements
- Series 140 Disposable Plastic Tube Mixers
- Series 141 Disposable Plastic Frother Mixers (For Foams)
- Series 160, 160A & 160AN Disposable Plastic Bell Mixers (Acetal Elements)
- Series 162A Disposable Plastic High Flow Bell (Oversized) Mixers
- Series 190 Disposable Plastic Bayonet Mixers
- Series 260, 261A & 261AN Disposable Plastic Bell Mixers (Polypropylene Elements)

Turbo Mixers™

- Series 180A & 180AN Disposable Plastic Turbo (Square) Bell Mixers
- Series 280 Disposable Plastic Turbo (Square) Integral Nut Mixers
- Series 281N Disposable Plastic High Flow Turbo (Square) Integral Nut Mixers
- Series 295 Disposable Plastic Turbo (Square) Bayonet Mixers

Recommended number of elements based on the adhesive being mixed:

Adhesive/Sealant	Number of Elements
Silicones	20-30
Polysulfides	24-32
Urethanes	24-36
Epoxies	15-24
Acrylics	8-20
